

# A COLORFUL FUN MEAL WITH PLENTY OF HEALTH BENEFITS!

An easy way for children to select food is by its color. A great idea to naturally differentiate your pasta is to add non-bleeding natural colorants. Black, white, green, yellow, orange... eat healthy and have fun!

To color pasta, only water-soluble natural colors can be used. Amazingly, only these natural colorants are encapsulated by starch, avoiding that they stain the water while being cooked.

These are only a few examples of the solutions we can provide. For further details regarding these or other BioColor natural colorants, please contact us or our agent in your country.

Always remember to verify local legislation regarding restrictions in the use of these colorants.
